Preface

Thank you for purchasing JINS MEME ES_R.

This instruction manual provides notes and instructions on how to use JINS MEME ES_R.

In order to enjoy prolonged use of your JINS MEME ES_R, read this manual carefully before use to use it correctly and safely. In addition, store this document safely in a place where you can view it as needed.

• Copying this document in part or entirety without permission is prohibited.
• Every effort has been made to ensure the accuracy of the content of this document, but if you notice any errors or have any questions, please contact the JINS MEME Customer Support.
• The contents of this document may change in the future without notice.
• The product could be damaged if it is used in a manner not described in this document.

■ Trademarks

• Android is a trademark or registered trademark of Google Inc.
• Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and other countries.
• Bluetooth is a trademark or registered trademark of Bluetooth SIG Inc. in the United States.
• Other company names and product names are trademarks or registered trademarks of their respective companies.
• The symbols ™ and ® are abbreviated for trademarks and registered trademarks in the text of this document.
Safety Precautions

JINS MEME ES_R is designed to be used as a normal pair of eyeglasses, but since it contains electronic components, it may result in damage that differs from normal glasses if used improperly. Please read the following safety precautions carefully to ensure proper handling of the product.

JINS MEME ES_R is not a medical product. The device and its associated apps cannot be used for diagnosis, treatment, or prevention of any disease, medical condition, or injury.

If any problems occur, stop use immediately and contact the JINS MEME Customer Support. Continued use under faulty conditions may lead to adverse physical effects.

Safety precautions are classified as “WARNING” and “CAUTION” according to the degree of harm or damage and urgency.

**WARNING**

- If you are wearing an implanted cardiac pacemaker or implanted cardioverter-defibrillator, keep the device at least 15 cm away from you. Otherwise, there is a risk of radio waves from the device affecting the operation of the implanted cardiac pacemaker or implanted cardioverter-defibrillator.
### WARNING

- **Do not use in a crowded place such as in a crowded train.**
  If there is anyone with an implanted cardiac pacemaker or implanted cardioverter-defibrillator present, there is a risk of radio waves from the device affecting the operation of the implanted cardiac pacemaker or implanted cardioverter-defibrillator.

- **Do not tamper with or alter the device in any of the following ways, dropping, bumping, bending excessively, deforming, drilling holes, or painting. Otherwise, it may lead to injury, damage, or failure.**

- **Do not leave the device and its accessories near or on top of an automobile air bag.**
  Otherwise, there is a risk of a serious accident if the air bag is activated.

- **Do not disassemble or alter the device. Do not attempt to repair it yourself. No parts in this Pack can be repaired by customers.**
  Otherwise, there is a risk of accident. Contact the JINS MEME Customer Support if your device fails.

- **Do not allow the device to get wet or expose it to moisture while charging.**
  Exposing it to moisture while charging can cause an electric shock, short circuit, or fire.

  - **Keep out of the reach of children under 12 years old while charging.**
    Otherwise, it may cause an electric shock or other accident.

- **Do not place the device near an open flame such as a gas range, candle, or stove, and do not directly apply hot air, such as from a dryer.**
  Otherwise, it may cause damage including a rupture, discoloration, deformation, overheating, fire or battery failure.

  - **Do not expose the device to prolonged direct sunlight. In addition, do not store in locations exposed to direct sunlight or high temperatures and humidity.**
    Otherwise, it may cause damage including a rupture, discoloration, deformation, overheating, fire or battery failure. When not in use, store it in its case.

- **Be sure to turn OFF the power of the device in areas where use of radio equipment is prohibited such as on an airplane or in a hospital.**
  Otherwise, it will adversely affect electronic and medical equipment and may cause a malfunction.

  - **The lens may break if it is subjected to a strong shock. It may break and result in blindness or serious injury to the eyes or head when used during intense contact sports or when hit by a ball or hard object.**

- **If you have allergies or sensitive skin, physical damage may occur or symptoms may worsen.**
  If you notice any physical symptoms, stop use immediately and consult your doctor.
### WARNING

**Notes on Handling the Built-in Battery**

- **Do not charge or use the device in extremely high (such as saunas) or low temperature environments.**
  Otherwise it may cause damage such as burns, discoloration, deformation, overheating, fire or battery failure.
  Use in an environment between 0 and 40°C.

- **Use only the included AC adapter and micro USB cable to charge the device.**
  Otherwise, it may cause an electric shock, short circuit, fire, malfunction or failure.

- **Turn off the device while charging.**

- **Do not wipe the device with a damp cloth while it is charging. Be sure to remove the included AC adapter and micro USB cable before cleaning the device.**
  Otherwise, it may cause an electric shock, short circuit, or fire.

- **Do not use the charging micro USB terminal and micro USB cable if they are dirty, contaminated, or deformed.**
  Otherwise, it may cause an electric shock, short circuit, or fire.

- **Always hold the tip of the plug when unplugging the AC adapter from the wall socket after charging. Also, do not plug or unplug with wet hands.**
  Otherwise, it may cause an electric shock, short circuit, disconnection, or other failure.

- **Charge the battery by following the instructions in this document for JINS MEME ES_R.**
  Otherwise, it may cause an electric shock, overheating, or battery failure.

- **Do not put the device into a fire or incinerate it.**
  Otherwise, the battery may ignite or explode.

### CAUTION

- **Store in a location out of reach of children under 12 years old.**
  Otherwise, it may lead to an injury or accident such as the swallowing of small parts.
Notes on Handling

To prevent damage to or failure of the device, follow the instructions below when handling it.

**NOTICE**

- **Use both hands when putting on or removing the device.**
  Carefully use both hands when putting on or removing the device.

- **When setting down the device, keep the convex side of the lens facing up.**
  The lens may be scratched if it is placed facing down.

- **Do not apply heat to the device or place it in any location that is subject to high temperatures.**
  Otherwise, the frame may deform or crack.

- **Remove the device and turn the power OFF before going to sleep.**
  Sleeping while wearing the device can cause deformation, damage, or malfunction.

- **The device is designed for adults and is not suitable for children to wear.**
  If the device does not fit properly, the three-point electrooculography sensor, three-axis acceleration sensor, and three-axis gyro sensor may not accurately detect or obtain data.

- **Do not replace the battery of the device. The battery is built-in, and cannot be replaced.**
  If the battery cannot be charged, contact the JINS MEME Customer Support.

- **Do not take the device into bathrooms, saunas, swimming pools or any other area where it may come in direct contact with water.**
  Otherwise it can cause a short circuit or malfunction.

- **Do not use an abrasive liquid, alcohol, thinner, benzene, or polish remover to clean the device. Also, do not wash it with water.**
  Otherwise it can cause discoloration, deformation, damage, or malfunction.

- **Do not insert anything into the micro USB terminal other than what is specified in this document.**
  Otherwise, the internal components may be damaged.

- **Do not store the device with any hard object such as metal as it may scratch the device and visibility may be impaired.**

- **Always close the USB port cover when wearing the device.**
  The penetration of water or sweat can cause malfunction.

- **Dispose of accessories for the device, such as the AC adapter, in accordance with local regulations.**

- **Recycle the package in accordance with local regulations.**
Notes on Handling the 3-point Electrooculography Sensor Parts (nose pad and inter-eyebrows part)

- Do not press or bend the three-point electrooculography sensor. Otherwise it can cause damage or malfunction.
- When adjusting the nose pads, make sure you do so while supporting the base of the nose pad to ensure that no damage is caused. Use of excessive force and consistent adjustment can damage the nose pads so please take care when performing adjustments. Damage caused by excessive force will not be covered under warranty.
- After use, gently wipe the sensor part with a soft cloth such as a cleaning cloth. If not handled carefully, it may cause a malfunction or failure.
- If the three-point eye potential sensor part is dirty with sweat, sebum, or cosmetics, gently wipe it. Leaving it dirty may impair the measurement.

Notes on Radio Waves

Bluetooth uses the 2.4 GHz frequency band. In addition to industrial, scientific, and medical equipment such as microwave ovens, this frequency band is also used by other radio stations of the same type, on-board radio stations for mobile identification requiring licenses such as those used in factory production lines, specified low power radio stations that do not require licenses, and amateur radio stations (hereinafter referred to as "other radio stations").

- Make sure there are no "other radio stations" in the vicinity before communicating with the device. If there is radio wave interference between the device and "other radio stations", immediately change the location of the device, disconnect the Bluetooth, or turn OFF the power of the device. If this does not solve the problem, contact the JINS MEME Customer Support.
- Keep away from other electrical appliances (such as microwave ovens or digital cordless phones) when communicating. When communicating in the vicinity of such equipment, normal communication may not be possible or radio interference may occur. If communication is affected, move away from such equipment.
- When a broadcast station or radio equipment is nearby and normal communication is not possible, change the location of the device. Normal communication may not be possible when the surrounding radio waves are too strong.
- If there is a device equipped with wireless LAN in the vicinity of the device, radio interference may occur and communication speed may be reduced or connection may be impossible. Keep away from any device equipped with wireless LAN when communicating.
Notes on Disposal

Information on Disposal for Users of Waste Electrical & Electronic Equipment

This symbol on the product means that used electrical and electronic equipment should not be mixed with general household waste.

The correct disposal will help prevent potential negative effects on human health and the environment.

For proper treatment, recovery and recycling of old products, please take them to applicable collection points, in accordance with your national legislation.

For more information about collection and recycling of used products, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

1. Unit Description

1.1 Checking the Package Content

After opening the box, check the content of the package and the unit itself. If any item is missing or damaged, please contact the JINS MEME Customer Support.

The following items are included in this product:

- JINS MEME ES_R (main unit) ….. 1
- USB cable (for charging) ……… 1
- Bluetooth ID* …………………….. 1
- AC adapter ……………………… 1
- Cleaning cloth ……………………. 1
- Warranty ……………………….. 1
- Declaration of Conformity ……… 1

* If the product is defective, the Bluetooth number is necessary for product identification. Store the number in a safe place along with your warranty.
1.2 Part Names

- JINS MEME ES_R

* Shown in the figure with the USB port cover removed.
2. Before Use

2.1 Switching Operations

Use the power button to operate the power and its connection of the device.
* The LED may not respond depending on the power status. In this case, charge the device.

• Turning the power **ON**
  Press and hold the device’s power button for 2 seconds, then release it.
  The LED flashes blue and enters advertising mode (communication standby).

**Tip**  If the device is not connected while in advertising mode, the LED turns red then the power turns off after 10 seconds.

• Turning the power **OFF**
  Press and hold the device’s power button for 3 seconds.
  The LED turns red then the power turns off after 10 seconds.

**Tip**  Refer to section "3.2.2 Connecting with JINS MEME ES_R" for information on connection for measurement.
2.2 Charging Time and Usage Time

The approximate charging time and usage time of the device are as follows:

- Charging time: Approx. 2 hours
- Continuous use time: Up to 16 hours

2.3 Charging Method

The built-in battery is not fully charged at the time of purchase. Please charge it before using.

Be sure to use the included AC adapter and micro USB cable to charge.

**WARNING**

- Do not allow the device to get wet or expose it to moisture or rain while charging. Exposing to moisture while charging can cause an electric shock, short circuit, or fire.
- Turn off the device while charging.
- Use the included AC adapter and micro USB cable to charge the device. Otherwise, it may cause an electric shock, short circuit, fire, malfunction or failure.
- Keep out of the reach of children under 12 years old while charging. Otherwise, it may cause an electric shock or other accident.

**Important**

- When charging for the first time, do not use until the device is fully charged.
- Always charge before using when use, for the first time or after an extended period of disuse.
- If the LED is not lit when connected to via USB cable to the AC adapter, unplug the USB cable and plug it in again.

1. Insert the USB cable into the AC adapter.
2. Insert the USB cable into the micro USB terminal of the device.
3. Plug the AC adapter into the wall outlet.

The LED turns on red and charging starts. Charging is complete when the red LED turns off.

* The charging time depends on the remaining amount of battery and charging condition.

**Tip**

The device can also be charged from a PC. To charge from a PC, connect the micro USB terminal of the device to the USB terminal of the PC using a USB cable.
3. Using from a PC

3.1 Installing the Software

Customized software must be installed on your PC in order to check the data obtained with the device in real time.

3.1.1 Downloading the Software

Download the software from the separately described download page.

3.1.2 Installing

1. Extract the zip file and double-click the setup.exe file in the app folder.
   
   The installer starts and the initial window appears.
   
   **Important** If you are logged in with a non-administrator account, the [User Account Control] window appears. Request the administrator to perform the installation if you wish to continue.

   **Tip**
   - See the separate email for the storage location of the setup.exe file.
   - It may be shown as “setup” depending on the Windows display setting.

2. Check the software version and click the Next button.

   ![Initial window](image)

   Initial window

   The [User Information] window appears.
3. Enter the user name, organization name, and serial number and click the Next button.

![User Information Input window]

User Information Input window

The [Select Destination Location] window appears.

**Important** The Next button will not operate if the serial number is incorrect.

4. Specify the software installation destination and click the Next button.

![Select Destination Location window]

Select Destination Location window

The [Select Start Menu Folder] window appears.
5. Specify the folder name to register on the Start menu and click the **Next >** button.

![Select Start Menu Folder window](image)

The [Select Additional Tasks] window appears.

6. Specify creation of desktop icon and click the **Next >** button.

![Select Additional Tasks window](image)

The [Ready to Install] window appears.
7. Check the input information and click the **Install** button.

![Ready to Install window](image)

8. When the Installation Completed window appears, click the **Finish** button.

![Installation Completed window](image)

When software installation is finished, the Installation Completed window closes.
3.2 Establishing Communication with JINS MEME ES_R

In order to use the functions of JINS MEME ES_R, communication must be established between the dongle connected to the PC and the device.

3.2.1 Connecting the Dongle

Establish communication between the device and the dongle.

1. Insert the dongle in any USB port on the PC.

2. Click **JINS MEME ACADEMIC** icon and start the software.

   The Data Acquisition window appears.

   **Tip** Refer to “3.6.1 Data Acquisition Window” for the details of the screen to be displayed.

3. Click the **Scan port** button to search the dongle.

   The combo box shows the port number of the USB.

   **Important** If the dongle driver is not found, try the CP210x USB - UART bridge VCP driver provided by Silicon Labs.

4. Select the destination port number from the list and click the **Open** button.
The Open button changes to the Close button and dongle communication is established.

3.2.2 Connecting with JINS MEME ES_R

Establish communication between the device and the dongle.

- **Turning ON the device**
  
  Refer to section “2.1 Switching Operations” and turn on the device.

- **Enabling the device connection (advertising mode)**
  
  1. With the device’s power turned ON, press and hold the device power button for 2 seconds and then release.

     Advertising mode is enabled when the LED quickly flashes blue.

- **Connecting the device**
  
  1. When a connectable device is nearby, click the Scan device button.

     This will start scanning for a connectable device.

     **Tip** Select the ID that is on the seal included with the package at the time of purchase.

     The combo box shows the ID of the connectable device.

     The device is found

     The device is not found
2. Select the device to connect to and click the **Connect** button.

The **Connect** button changes to the **Disconnect** button and communication is established. When successfully connected, the device’s LED turns blue then turns off after 10 seconds.
3.3 Measuring with JINS MEME ES_R

Start measuring with JINS MEME ES_R.

3.3.1 Starting Measurement

Specify the “Select mode”, “Transmission speed”, “Measurement range of Accelerometer”, and “Measurement range of Gyroscope”, and click the Start Measurement button to send measurement values from the device and start drawing graphs.

Tip Refer to “3.6.2 Review Data Window” for the details of each item.

Important No graph is drawn when Quaternion is selected for Select mode.

3.3.2 Stopping Measurement

Click the Stop Measurement button while measuring to stop measurement.
3.4 Disconnecting Communication

3.4.1 Disconnecting Communication with JINS MEME ES_R

1. Click the **Disconnect** button while measurement with JINS MEME ES_R is stopped.

   The **Disconnect** button changes to the **Connect** button and communication is disconnected.

3.4.2 Disconnecting Communication with the Dongle

1. While dongle communication is established from any USB port, click the **Close** button.

   The **Close** button changes to the **Open** button and dongle communication is disconnected.
3.5 Uninstalling the Software

Select Control Panel>Program>Program and Function.
Select “JINS MEME Data Logger ****” from the program list and uninstall.

1. Click the Yes button to start uninstalling.

![Uninstall window]

Wait until uninstall completes.

2. Click the OK button to close the Uninstall window.

![Uninstall Completed window]

### 3.6.2 Review Data Window

#### No. | Name | Description
--- | --- | ---
1 | Settings (S) | Displays the Settings window (described later). (* Disabled during dongle communication.*)
2 | Version (V) | Displays the Version Information window.
3 | Switch tab | Switches between the Acquire Sensor Data tab and the Review Sensor Data tab.
4 | Status bar | **Battery Level**
   - Displays the five step battery level of the measuring instrument during measurement.

**MEME Version**
- Displays the version information of the connected device.

**Dongle Version**
- Displays the version information of the connected dongle.

5 | Graph type setting | Sets the type of graph to be displayed. Select one of the following types from the combo box and click the [Apply] button to apply to the graph.
   - **Hide**: Hide the graph.
   - **Accelerometer**: Display the accelerometer sensor values.
   - **Gyroscope**: Display the gyroscope sensor values.
   - **Electrooculography**: Display the electrooculography sensor values.
<table>
<thead>
<tr>
<th>No.</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| 6-1 | Graphs | Displays the graphs. Use the mouse to zoom or scroll while measurement is stopped.  
  **Zoom**  
  Left click the mouse on the graph and use the mouse wheel to zoom in/out.  
  **Scroll**  
  Left click the mouse on the graph and drag the mouse to scroll. |
| 6-2 | Graph Legend data selection | Displays/hides the legend data graph.  
  Checked: Display the graph.  
  Unchecked: Hide the graph. |
| 7   | Acquire/Select File | Acquires and displays a list of files containing measurement data. (* Disabled during dongle communication.)  
  **Previous files with measurement data**  
  Displays a list of acquired file names.  
  **Set data folder**  
  Displays a dialog box to specify the file acquisition destination folder. |
| 8   | Selected file information | Displays information of the file selected from the file list.  
  **Data mode**  
  Displays the measurement mode.  
  **Transmission speed**  
  Displays the Bluetooth communication speed between the device and the dongle.  
  **Accelerometer sensor’s range**  
  Displays the accelerometer sensor measurement range.  
  **Gyroscope sensor’s range**  
  Displays the gyroscope sensor measurement range.  
  **From**  
  Displays the date and time (GMT) the measurement is started.  
  **To**  
  Displays the date and time (GMT) the measurement is stopped. |
| 9   | File review | Reviews the selected file.  
  **Replay speed**  
  Set the dynamic review replay speed.  
  **Start**  
  Start the dynamic review.  
  **Pause / Resume**  
  Pause or resume the dynamic review.  
  **Stop**  
  Stop the dynamic review.  
  **Plot the Data**  
  Click the [Start] button and then the [Plot the Data] button to batch load the file data and display statically. |
### 3.6.3 Settings Window

| 1   | Sensor data Save folder     | Specifies the folder in which to save the sensor data.  
**Browse**
Display the folder selection dialog and specify the save destination.  
**Open Folder**
Open the save destination folder in Explorer. |
| 2   | Acceleration DC offset      | Specifies the offset to display the acceleration sensor data as graph.  
The sensor raw data will be saved as a file.  
(offset is excluded)  
**X-Axis** Specify the X-axis offset.  
**Y-Axis** Specify the Y-axis offset.  
**Z-Axis** Specify the Z-axis offset. |
| 3   | Show save file dialog       | Displays/hides Change Save File Name dialog when the measurement is complete.  
**Checked**
Display the Change Save File Name dialog.  
**Unchecked**
Hide the Change Save File Name dialog.  
The default name is used. (BLT address_record_start_date_time.csv) |
| 4   | TCP socket communication    | Enable/disable TCP socket communication.  
**Checked**
Enable TCP socket communication and setting of IP address and Port number.  
**Unchecked**
Disable TCP socket communication.  
Refer to section "3.6.4 TCP Socket Communication Receive Format" for the content of the recorded data. |
| 5   | Apply/Cancel                | Saves or cancels the parameters specified in this window. |
3.6.4 TCP Socket Communication Receive Format

The socket communication log file consists of two parts: the header containing the measurement information and the body containing the sensing data. The header contains the measurement information “Data mode, Transmission speed, Accelerometer sensor’s range, Gyroscope sensor’s range, and data rank” respectively.

Example: For Select mode “Full”, Transmission speed “100Hz”, Measurement range of Accelerometer “±4g”, and Measurement range of Gyroscope “1000dps”

// Data mode : Full
// Transmission speed : 100Hz
// Acceleration sensor’s range : 4g
// Gyroscope sensor’s range : 1000dps

■ Data Rank in each Measurement Mode

1) When Measurement Mode is “Standard”

//ARTIFACT,NUM,DATE,ACC_X,ACC_Y,ACC_Z,EOG_L1,EOG_R1,EOG_L2,EOG_R2,EOG_H1,EOG_H2,EOG_V1,EOG_V2

Description

Artifact, Total count, Measurement date/time, Acceleration sensor value (X-axis), Acceleration sensor value (Y-axis), Acceleration sensor value (Z-axis), EOG sensor value 1 (left), EOG sensor value 1 (right), EOG sensor value 2 (left), EOG sensor value 2 (right), EOG sensor value 1 (horizontal difference), EOG sensor value 2 (horizontal difference), EOG sensor value 1 (vertical difference), EOG sensor value 2 (vertical difference)

Example:

// Data mode : Standard
// Transmission speed : 50Hz
// Acceleration sensor’s range : 2g
// Gyroscope sensor’s range : 250dps

//ARTIFACT,NUM,DATE,ACC_X,ACC_Y,ACC_Z,EOG_L1,EOG_R1,EOG_L2,EOG_R2,EOG_H1,EOG_H2,EOG_V1,EOG_V2
1,2016/03/15 01:25:10.85,790,329,16523,-59,-189,-21,-165,130,144,124,93
2,2016/03/15 01:25:10.87,746,369,16503,-42,-158,-7,-153,116,146,100,80
3,2016/03/15 01:25:10.89,801,302,16553,-48,-161,-16,-152,113,136,104,84
2) When Measurement Mode is "Full"

```
```

Description
Artifact, Total count, Measurement date/time, Acceleration sensor value (X-axis), Acceleration sensor value (Y-axis), Acceleration sensor value (Z-axis), Angular velocity sensor value (X-axis), Angular velocity sensor value (Y-axis), Angular velocity sensor value (Z-axis), EOG sensor value (left), EOG sensor value (right), EOG sensor value (horizontal difference), EOG sensor value (vertical difference)

Example:
```
// Data mode : Full
// Transmission speed : 100Hz
// Acceleration sensor's range : 2g
// Gyroscope sensor's range : 250dps
//
,1,2016/03/15 01:26:07.23,780,254,16542,0,33,-66,4,-171,175,83
,2,2016/03/15 01:26:07.24,737,293,16559,-7,11,-79,12,-150,162,69
,3,2016/03/15 01:26:07.25,896,249,16539,15,34,-58,-9,-196,187,102
```

3) When Measurement Mode is "Quaternion"

```
//DATA_MODE : Quaternion
// Transmission speed : Standard
// Acceleration sensor's range : 2g
// Gyroscope sensor's range : 2000dps
//
//ARTIFACT,NUM,DATE,QUATERNION_W,QUATERNION_X,QUATERNION_Y,QUATERNION_Z
```

Description
Artifact, Total count, Measurement date/time, Quaternion (W) Quaternion (X) Quaternion (Y) Quaternion (Z)
Example:

// Data mode : Quaternion
// Transmission speed : 50Hz
// Acceleration sensor's range : 2g
// Gyroscope sensor's range : 2000dps

//
//ARTIFACT,NUM,DATE,QUATERNION_W,QUATERNION_X,QUATERNION_Y,QUATERNION_Z
1,2016/3/21 15:51:53.32,13931501,1065299619133555066,-5213924
2,2016/3/21 15:51:53.34,13930073,1065376001,132938877,-5356280
3,2016/3/21 15:51:53.36,13922096,1065454235,132305442,-5497571
4. Using with an Android Device

The data acquired with the device can be saved on an Android device. In order to check the realtime data, copy the data from the Android device to the PC.

Data save destination: /sdcard/JINS/MEME_academic

Important: No graphs will be drawn with the software for Android devices.

4.1 Installing the Software

Customized software must be installed on your Android device in order to save the real time data obtained with the device.

4.1.1 Downloading the Software

Download the software from the download page.

4.1.2 Installing

1. From the software list on your Android device, tap on the ES File Explorer.

   The ES File Explorer starts.

   Tip: If the ES File Explorer is not installed, open any file manager app.

2. Navigate to the Download folder and tap on the saved application file.

   The Property dialog appears.
3. Tap **Install**

   The Install screen appears.

4. Tap **INSTALL**

   Software installation starts. Wait until it completes.

5. When the Installed screen appears, tap **DONE**

   The Installed screen closes when the software is installed.
4.2 Establishing Communication with JINS MEME ES_R

In order to use the functions of JINS MEME ES_R, a communication must be established between the dongle connected to the Android terminal and the device.

4.2.1 Connecting the Dongle

Establish communication between the device and the dongle.

1. From the list of applications, tap Data Logger and start the program.

The Opening screen appears.
2. Tap on the Opening screen to display the main screen and insert the dongle in the USB connector of the Android terminal.

A dialog to check the dongle connection appears.

**Tip** In order to use JINS MEME ES_R’s function from an Android terminal, you must connect the dongle using a USB connector conversion cable (sold separately).

3. Tap OK.

Tapping CANCEL returns you to the screen in step 2.

4. Tap OPEN.

Communication with the dongle is established.

When the inserted dongle becomes available, a screen indicating that the dongle is connected appears.
4.2.2 Connecting with JINS MEME ES_R

Establish communication between the device and the dongle.

■ Turning ON the device

Refer to section "2.1 Switching Operations" and turn on the device.

■ Enabling JINS MEME ES_R Connection (advertising mode)

1. With the device's power turned ON, press and hold the device's power button for 2 seconds and then release.

Advertising mode is enabled when the LED quickly flashes blue.

■ Connecting the device

1. Check that the screen indicates that the dongle is connected and tap SCAN DEVICE.

A scan for the device starts.

This scan for the device continues for approximately 6 seconds.

Tip

Select the ID on the seal included with the package at the time of purchase.

Tip

While the software is scanning for the device, all functions except for a part of the Main screen are disabled and a progress ring appears (figure at right).

If one or more device is found as a result of scanning for a device, the IDs of the found device will appear in the list of measuring instruments.

If no device is found, the screen at top right appears.
If the dongle is disconnected from the USB connector of the Android, the Main screen (step 2 in section “4.2.1 Connecting the Dongle”) appears.

2. **Select the device to connect and tap [CONNECT].**

Tap [CONNECT] while the screen is showing the image at right.

The screen at right appears when connection is completed.

In addition, the device’s LED turns blue then turns off after 10 seconds.
4.3 Measuring with JINS MEME ES_R

Start a measurement with JINS MEME ES_R.

4.3.1 Starting Measurement

1. Specify the Select mode, Transmission speed, Measurement range of Accelerometer, and Measurement range of Gyroscope, and tap START MEASUREMENT.

The Confirm Start of Measurement screen appears.

Tip Refer to “3.6.2 Review Data Window” for the detail of each item.

2. Tap OK.

Measurement data is sent from the device and saved.
4.3.2 Stopping Measurement

1. Tap **STOP MEASUREMENT** during measurement.

   The Confirm Stop Measurement screen appears.

2. Tap **OK**.

   Measurement values from the device are saved.
4.4 Disconnecting Communication

4.4.1 Disconnecting Communication with JINS MEME ES_R

1. Tap **DISCONNECT** while measurement with JINS MEME ES_R is stopped.

   Tap **DISCONNECT**. While the screen is showing the image at right (the device connection status is [Connected]).

   The screen at right appears when communication is disconnected.

4.4.2 Disconnecting Communication with the Dongle

When the software is terminated, the connected dongle is disconnected.

Connection is also lost when the dongle is disconnected from the USB connector of the Android device. When the dongle is disconnected from the Android device and connection is lost, the Main screen (step 2 in section “4.2.1 Connecting the Dongle”) appears.

</thead>
<tbody>
<tr>
<td>FCC</td>
<td>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. <strong>FCC CAUTION</strong> Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. <strong>Note:</strong> This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption ratio (SAR).</td>
